

**Jagpreet Chhatwal, PhD**

Assistant Professor, Harvard Medical School  
Senior Scientist, Massachusetts General Hospital

**Jagpreet Chhatwal, PhD** an Assistant Professor at Harvard Medical School and Senior Scientist at Massachusetts General Hospital. His research focuses on the application of mathematical modeling to inform public health policies. He leads health outcomes and cost-effectiveness projects in multiple disease areas including hepatitis C, hepatocellular carcinoma, nonalcoholic fatty liver disease, and liver transplantation. Dr. Chhatwal's recent research on hepatitis C has informed several highly-debated questions surrounding the cost-effectiveness of hepatitis C screening and treatments in the United States, India and elsewhere. His work has been featured in leading media such as The Wall Street Journal, Forbes, and National Public Radio. He currently serves as a cost-effectiveness and decision analysis editor of Clinical Gastroenterology and Hepatology.
