

Professor Naga Chalasani currently serves as David W. Crabb Professor of Medicine and Associate Dean for Clinical Research at Indiana University School of Medicine and is the Director of its Division of Gastroenterology and Hepatology. He completed his medical education in India and subsequently completed Internal Medicine residency and gastroenterology and hepatology subspecialty training at Emory University in Atlanta. He is a practicing hepatologist and is engaged in clinical and translational liver disease research. Two broad themes to his research focus are nonalcoholic fatty liver disease and idiosyncratic drug induced liver injury and he has made several important contributions to both of these areas. He has been funded by the National Institutes of Health since 1998 for conducting investigations related to liver disease. Currently, he is the PI for two NIH U01 awards, Co-PI for one NIH U01, and co-investigator for two NIH R01 awards. He has published over 250 original publications, 30 text book chapters and 26 editorials and commentaries. He is the lead author for the AASLD, AGA, and ACG multisociety practice guidelines for the diagnosis and management of nonalcoholic fatty liver disease (published initially in 2012 and updated in 2017). With Prof Gyongyi Szabo, he co-edited a text book "Alcoholic and Nonalcoholic Fatty Liver Disease (Springer) published in 2015. He is also the lead author for the ACG Practice Guideline on the diagnosis and management of idiosyncratic drug induced liver injury published in the American Journal of Gastroenterology in July 2014.
