

Robert G. Gish, MD

Short Biography

Robert G. Gish, MD

Dr Gish obtained his medical degree from the University of Kansas Medical School in Kansas City, Kansas. He completed a 3-year internal medicine residency at the University of California, San Diego, and a 4-year gastroenterology and hepatology fellowship at the University of California, Los Angeles.

Dr Gish is a fellow of both the American College of Physicians and the American Association for the Study of Liver Disease.

He has served on the editorial boards of American Journal of Gastroenterology, Journal of Hepatology, Digestive Diseases and Sciences, and Gastroenterology, among others. He has co-authored a public health policy for liver health in Vietnam and is also assisting with the development of health care policies in Armenia and the Philippines. He was a major early contributor to decipherment methods for the detection of hepatitis B and C virus and characterizing its epidemiology and clinical presentation in humans. He was involved in studies that led to the genotypic classification strategies and methods now in use worldwide. He has published more than 600 original articles, review articles, abstracts, and book chapters.

Robert G. Gish, MD, is currently an Adjunct Professor of Medicine at Stanford University in Palo Alto and also an Adjunct Professor of Medicine at the University of Nevada School of Medicine in Las Vegas. In addition, he is also Medical Director of the Hepatitis B Foundation in Doylestown, Pennsylvania.
