

Dr. Timothy Morgan is Chief of Gastroenterology at the VA Long Beach Healthcare System and Professor of Medicine at the University of California, Irvine.

He has been an investigator on clinical trials in alcoholic hepatitis and alcoholic cirrhosis for the past 30 years, including oxandrolone and nutrition, colchicine, and phosphatidylcholine. He is currently the PI on the Southern California Alcoholic Hepatitis Consortium, an NIH-funded consortium to evaluate new treatments and to better understand the pathophysiology of alcoholic hepatitis. He has also participated in multiple hepatitis C clinical trials, and is a member of the AASLD-IDSA hepatitis C treatment guideline committee and chair of the VA HCV treatment guidelines. He oversees programs to improve diagnosis and treatment of hepatitis C, and improve care for patients with cirrhosis, for the VA healthcare system.

Dr. Morgan is a member of the American College of Physicians, American Gastroenterology Association, the American Association for the Study of Liver Disease, and the European Association for the Study of the Liver.
